

2300°F / 1260°C: CerMax™ Extreme High Temperature +Plus, Heat & Flame Resistant Ceramic Fiber Paper: Premium Grade

- An alternative to asbestos.
- Light-weight, flexible, good handling strength
- Low thermal conductivity, good dielectric strength
- Excellent corrosion resistance
- Can be die-cut or stamped
- Produced from an extremely pure aluminosilicate ceramic fiber non woven fabric.
- Can be used at 2300°F / 1260°C continuously. Melts above 3000°F.

2300°F / 1260°C continuous rating, high insulation value & excellent personnel protection
